PROFILE

Full Stack Web Developer with 3+ years of experience. I excel in building dynamic applications using React. Angular, Node.js, and Nest.js. I'm proficient in REST APIs, and SQL/NoSQL databases, with experience in GraphQL and microservices. My track record includes delivering solutions that enhance sales and customer satisfaction.

PROFESSIONAL EXPERIENCE

DevGate Consultancy (Mar 2024 - Sep-2024 | Onsite) Full-Stack Software Engineer (MERN, PERN, MEAN)

- Built full-stack Easypaisa Committee Mini-app in PERN
- Contributed to the International China Project by developing REST-based microservices using SQL, Node TS, and NoSQL databases
- Developed robust, and scalable Zoho CRM API-centric infrastructures by implementing standard practices

VisualSoft Global LLP (Oct 2023 - Dec 2023 | Remote) React JS and WordPress Developer

- Created a live-streaming application with real-time chat with React and Agora API
- Developed WordPress website for VisualSoft Global LLP with WPBakery Builder
- Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance

TechArch (March 2020 - Sep 2023 | Remote) Frontend and React JS Developer

- Developed single-page applications by leveraging React and Redux with dynamic content and real-time updates
- Developed an interactive dashboard using React and Tailwind that allowed users to visualize data in real-time
- Developed a system for tracking employee attendance and time off, reducing time off abuse by 50%
